Driving LawTech Adoption

Networking Event

16 May | 6:30pm | The Clubhouse, One Angel Court, London

Last year **The Law Society** commissioned TechMarketView to undertake a major review (report published February 2019) of the UK's lawtech market, looking at barriers and drivers to adoption, the maturity of the market by legal segment and the implications for the future of the law. Lawtech has recently seen a huge amount of start-up activity in the UK with law firms under increasing pressure to embrace new technologies. To help promote the sector we are hosting (with sponsors Conduent) a **networking event** – **'Driving LawTech Adoption'**. The evening will offer fantastic networking opportunities amongst the legal/legal tech community.
